I'm a fresh graduate student majoring in Informatics Engineering at Jakarta State Polytechnic with a strong passion for web design. I have developed solid programming skills in languages such as Java, Python, HTML, XHTML,React.js, Vue.js, and PostgreSQL. Fluent in English and confident in public speaking, I'm an effective communicator and a strong team player. I'm always eager to learn, grow, and take on new challenges in both technical and collaborative environments.

EDUCATION

Bachelor of Applied Science, Informatics Engineering — **Aug 2022 – Sept 2026**
Politeknik Negeri Jakarta — **GPA:** 3.51

Cloud Computing Cohort — **Aug 2024 - Dec 2024**
Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

Associate's degree, Informatics Engineering — **Aug 2022 - Aug 2024**
CEP – CCIT FTUI — **GPA:** 3.05

PROJECTS

Monster Hunter World Wiki

A pure XHTML-based website built with the Bootstrap 5 framework, named MHW Wiki. It is designed to help new players of Monster Hunter: World learn about monsters, locations, and quest rewards in a structured and accessible way. • Built using JavaScript for the backend and Firebase for database management.

AlZain IT and Medical Solution

Website to help people with Medical and IT Problem • AlZain IT and Medical Solution is a website to help people with Medical problem and IT problem. • Offers helps in IT field, Starting form creating a website for business or personal, even able to host a website. Medical Field offer helps starting from Health Check to even Clinic Activity. • Utilized IDCloudHost to deploy the website for easy access, https://alzainitandmedical.id/ .

TerasTV

- Developed **TerasTV**, a specialized Android application built with **Kotlin** designed to monitor and track active applications running on Smart TV devices.
- Integrated the client-side Android application with a **PHP REST API** backend to ensure seamless, real-time data synchronization and tracking logs.
- Managed application data workflow, focusing on cross-platform data parsing and maintaining clean state management for layout presentation on large-screen TV interfaces.

The Sovereign Guild

- Developed **Sovereign Guild**, an immersive gamified task management web application that transforms daily productivity into an engaging RPG-themed experience featuring levels, custom achievements, and system buffs.
- Architected a scalable, modular front-end architecture using clean code principles to split complex core functionalities—such as live multiplayer duels, invitation systems, real-time chat, and quest tracking—into highly reusable files and components.
- Implemented complex, relational database schemas (PostgreSQL/MySQL) managed via advanced management tools to support dynamic UI rendering based on live user statistics, active debuffs, and guild milestones.

TSM– Targeted Money Saver

Mobile Application to save money for buying • Developed TMS (Targeted Money Saver), a smart financial management app that integrates Android (Kotlin), Machine Learning, and Cloud Computing to help users optimize spending habits. • Implemented TensorFlow models in Jupyter Notebook for personalized money-saving recommendations, connected via a Python REST API, with data managed using Firebase and Firestore.

SKILLS

Soft Skill: problem-solving, communication, teamwork, public speaking, time management

Hard Skill: UI/UX Design, HTML, CSS, JavaScript, Firebase, Python, Vue.js, React.JS, Supabase, PostgreSQL,Android, Kotlin

Software Skill: : Visual Studio Code, Android Studio, Figma, Microsoft Office, Canva, Google Cloud Platform, Github, Google Stitch

CERTIFICATIONS

Google Cloud Certified – Associate Cloud Engineer by **Google** — **May 2025**
CEP – CCIT FTUI Program Certificate by **NIIT** — **Mar 2025**
Bangkit Academy 2024 – Cloud Computing Cohort by **Google** — **Jan 2025**
Associate Data Scientis – BNSP — **Aug 2025**
Junior Web Developer – BNSP — **June 2026**

LANGUAGES

Bahasa Indonesia (Native proficiency) • **English** (Professional working proficiency) • **Japanese** (Elementary proficiency)

WORK EXPERIENCE

Software Engineering Intern **Aug 2025 - Nov 2025**
Setjen Vokasi Kemendikbud **Jakarta**

- Developed TerasTV, a specialized Android application in Kotlin for Smart TV device monitoring.
- Integrated client applications with PHP REST APIs to ensure real-time data logging and synchronization.
